Follow My Star

Dj Sammy

You're talking about the moon
Appears a little weird
As the radio plays romantic tunes
Your heart is getting seared
Every starry night in June
You declare a mystic sign
In your point of view
Incredible predictions work out fine
Each time we're out together
Your funny words sound better
You tend to complicate
Simple things in life
Follow my star
And it will guide you to where you belong
Don't wait too long
For there's a reason you could do no wrong
Follow my star
And it will guide you through the longest night
Don't hesitate
It might be blinding for it shines so bright
You're reading horoscopes
Each word you do believe
As a matter of fact your poems
Show a state you have to leave

Any little step you take
You want me to precede
Would you ever listen if I drop
The charming lines you need?
Each time we're out together
Your funny words sound better
You tend to complicate
The simple things in life
Follow my star
And it will guide you to where you belong
Don't wait too long
For there's a reason you could do no wrong
Follow my star
And it will guide you through the longest night

Don't hesitate
It might be blinding for it shines so bright
Follow my star
And it will guide you to where you belong
Don't wait too long
For there's a reason you could do no wrong
Follow my star
And it will guide you through the longest night
Don't hesitate
It might be blinding for it shines so bright
