

# Follow My Star

Dj Sammy

You're talking about the moon  
Appears a little weird  
As the radio plays romantic tunes  
Your heart is getting seared  
Every starry night in June  
You declare a mystic sign  
In your point of view  
Incredible predictions work out fine  
Each time we're out together  
Your funny words sound better  
You tend to complicate  
Simple things in life  
Follow my star  
And it will guide you to where you belong  
Don't wait too long  
For there's a reason you could do no wrong  
Follow my star  
And it will guide you through the longest night  
Don't hesitate  
It might be blinding for it shines so bright  
You're reading horoscopes  
Each word you do believe  
As a matter of fact your poems  
Show a state you have to leave

Any little step you take  
You want me to precede  
Would you ever listen if I drop  
The charming lines you need?  
Each time we're out together  
Your funny words sound better  
You tend to complicate  
The simple things in life  
Follow my star  
And it will guide you to where you belong  
Don't wait too long  
For there's a reason you could do no wrong  
Follow my star  
And it will guide you through the longest night

Don't hesitate  
It might be blinding for it shines so bright  
Follow my star  
And it will guide you to where you belong  
Don't wait too long  
For there's a reason you could do no wrong  
Follow my star  
And it will guide you through the longest night  
Don't hesitate  
It might be blinding for it shines so bright
