

14 Days

Plunkett

Safe in a small world
Embrace these fourteen days
Absorbed in a small world
For ten years I've laid in wait
It came real close you know
But it's faded away
We've all got a small world
With some our circles collide
But I'm alone in my small world
Though I love and know that I'm loved
It really did come close before
But I've passed its dying day
Near the end of what was most dear to me
The most beautiful thing came
And so now I'm falling up
To what I've found
And when I'm there
We'll walk with one colour and sound till the end
I'm falling up to the choice that I'd always made
If I go from my small world
I'll miss those whose lines crossed with mine
But far away there's a part of me
A soul that belongs with mine
It's not how I'd planned it all
Perhaps our destiny is fate
This time it's just for me
And I'm there before I've gone
Because I'm just falling up
To what I've found
And when I'm there
We'll walk with one colour and sound till the end
I'm falling up through the tears that fall down
Each touched with sadness but it's joy so profound
I'm falling up to the choice that I'd always made
