

While You're Away

New Buffalo

While You're Away I've got plans to take you down
 Privately we'll make a time
 Taking notes and making charts
One machine to map the heart Silver lining in your mind
 Look inside but never find
 Hanging pictures on the wall
While you're thinking how you left all While you're away
 With stars in your eyes
The infection is so close to the heart
 Give me some time
 It's all that I need
You lie beside your dreams in the dark Please pick up the phone
 I picture you asleep
 And you're alone
 You're listening to the sound
 Of your inside
It's never been so sweet or so alive While you're away
 With stars in your eyes
The infection is so close to the heart
 Give me some time
 It's all that I need
You lie beside your dreams in the dark Give me some time
 It's all that I need
 Give me some time
 It's all I need Give me some time
 It's all that I need
 Give me some time
 It's all that I need
 Give me some time
 It's all that I need
 Give me some time
 It's all that I need
