Something You Said

Voodoo Sioux

I didn't stand a chance
I heard a voice within
With just a passing glance
You made the walls cave in
You were gone baby without a wordI got the message loud and clear
Couldn't help but hear
As you were walkin' away
It was something you saidNow I wake up in the night
Strange things in my head
Oh, you did it with your eyes
It must'a been something
Must'a been something you said
So say it againI'm just delirious
Caught in a waking dream
Did you mean what you said
An' did you say what you meanMere words, fade away
You had a language I couldn't miss
It was on your lips, but
You didn't get me that way
It was something you saidNow I wake up in the night
Strange things in my head
Oh, you did it with your eyes
It must'a been something
Must'a been something you said
So say it againIn the middle of the night
All alone in my bed
It was nothin' you could write
It must'a been something
Must'a been something you said
