

# Topics

## Nevertheless

She spent the night out  
With a guy who  
Gives attention when she cries herself to sleep  
I heard her say

And so she gives him what he wants  
As long as he can make her feel okay  
But she's not okay

(Chorus)  
And we avoid the topics  
We make the kids have secrets  
When they are exposed  
And everyone else knows

We'll say we never knew it  
That they had a problem  
'Cause if we would have known  
We surely would have solved it

But we can't  
It's too late  
I said we can't  
It's too late

He's skipping classes  
'Cause he hates them  
Hopes he passes not to take them all again  
I heard him say

He escapes them with the pills  
The ones he takes to him feel like he's okay  
But he's not okay

(Chorus)  
And we avoid the topics  
We make the kids have secrets  
When they are exposed  
And everyone else knows

We'll say we never knew it  
That they had a problem  
'Cause if we would have known  
We surely would have solved it

But we can't  
It's too late  
I said we can't  
It's too late

God you've got to save us  
We hide behind the faces that we make to disguise

(Chorus)

The things that we're ashamed of  
And all the ugly things that make us close our eyes  
They make us close our eyes  
Why do we close our eyes?

We'll say we never knew it  
That they had a problem  
'Cause if we would have known  
We surely would have solved it
