Tumbledown

Catherine Wheel

Shout just to make it clear
So loud so as you don't hear
That I made no sound
The second time around
If all is turned around

So smooth just to show you care
You built a new mountain there
That I can tumble down
The very first time around
The very first time around
The very first time around

I let you see how high life could be
But you dropped me down
The very first time around
The very first time around
The very first time around
