

# Black Winter Night

## DragonForce

Day after day as I bodies slay  
And the sun becomes dark in the sky  
Everything's lost for this human race  
And the dawn of a new age will rise  
Rays of sunlight now are gone  
Only visions of ice will remain  
The fallen ones and forgotten souls  
Will rise up over the slain  
No more hope  
As we raise our hands to the sky  
No more dreams  
As the rivers run dry  
Everything's lost, all is left astray  
Only sorrow and sadness remains  
Curtains have dropped on our fallen world  
And the forces of darkness shall rise  
Why can't you see what has happened to thee?  
Can you not open your eyes?  
Everything's lost, there is no retreat  
And the valleys echo with pain  
No more hope  
As we raise our hands to the sky  
No more dreams  
As the rivers run dry  
On the endless seas of madness, we sail forever more  
And the endless tears of sadness towards the distant shores  
When the flame has died forever we stand one and all  
With the power of the almighty sword  
We fight the battle on the fields tonight  
To save us from the master of all evil sign  
And to the battle on, forever standing strong  
We feel the fire power of the night warriors  
No more tomorrow  
Dying of sorrow  
Over the mountains and up through the trees  
Traveling across seven seas  
No more hope  
As we hold our hands to the sky  
No more dreams  
As the rivers run dry  
On the endless seas of madness, we sail forever more  
And the endless tears of sadness towards the distant shores  
When the flame has died forever we stand one and all  
With the power of the almighty sword  
We fight the battle on the fields tonight  
To save us from the master of all evil sign  
And to the battle on, forever standing strong  
We feel the fire power of the night warriors  
On the endless seas of madness, we sail forever more  
And the endless tears of sadness towards the distant shores  
When the flame has died forever we stand one and all

With the power of the almighty sword We'll fight the battle on the fields tonight  
To save us from the master of all  
We fight the battle on the fields tonight  
To save us from the master of all evil sign And to the battle on, forever standing strong  
We feel the fire power of the night warriors  
The power of the night warriors
