

# Real Life

## Girls Aloud

'Cos, baby, this is real life  
You wanna get your mind on your occupation  
The moment's got to feel right  
'Cos, honey, if it don't then get out the station 'Cos, baby, this is real life  
You wanna get your mind on your occupation  
The moment's got to feel right  
'Cos, honey, if it don't then get out the station You gotta get it, you gotta get it  
And pretty soon you'll find the figures fit  
You gotta get it, you gotta get it  
And find your groove before the others trip It started with a look  
And pretty soon it was a valentine  
And when the whole earth shook  
I passed him over to a friend of mine He started as a squeeze  
But pretty soon he was a tourniquet  
I'll take my life back please  
I liked it better with the time to play Show us your look  
I think I'm falling  
Show us your look  
I'm not done crawling  
Show us that look  
Or I'll keep stalling you I was thinking of nights without you  
Damn right, I'll see it through  
And I was thinking of life without me  
And now I know it's just insanity 'Cos, baby, this is real life  
You wanna get your mind on your occupation  
The moment's got to feel right  
'Cos, honey, if it don't then get out the station 'Cos, baby, this is real life  
You wanna get your mind on your occupation  
The moment's got to feel right  
'Cos, honey, if it don't then get out the station Dance while your dollar going up, up, up  
And catch your lucky number while it's rising, rising  
Chance comes a calling going knock, knock, knock  
It's better to be living than surviving It started with a kiss  
And pretty soon it was a compromise  
But with a kung fu twist  
I pulled his focus back in on my mind It started with a drink  
Then baby soon became a waterfall  
But then my face turned pink  
'Cos I believed him when he said he'd call Show us your look

I think I'm falling  
Show us your look  
I'm not done crawling  
Show us the look  
Or I'll keep stalling you I was thinking of nights without you  
Damn right, I'll see it through  
And I was thinking of life without me  
And now I know it's just insanity 'Cos, baby, this is real life  
You wanna get your mind on your occupation  
The moment's got to feel right  
'Cos, honey, if it don't then get out the station 'Cos, baby, this is real life  
You wanna get your mind on your occupation  
The moment's got to feel right  
'Cos, honey, if it don't then get out the station Dance while your dollar going up, up, up  
And catch your lucky number while it's rising, rising  
Chance comes a calling going knock, knock, knock  
It's better to be living than surviving Dance while your dollar going up, up, up  
And catch your lucky number while it's rising, rising  
Chance comes a calling going knock, knock, knock  
It's better to be living than surviving 'Cos, baby, this is real life
