Leaf

Elle Varner

Any man just wants to be needed
I can need you all of my life
And you'll never know 'till you're alone
How it feels to have love on your side
So when you go into the night, I will be there
Your brightest star
I'll look you in the eye, follow you home
Surround you
It's a light you've never known, I will be there
Lighter than a leaf in your pocket
I'll be the air
And when you smile, I will be there
And when you cry, I will be there
Lighter than a leaf in your pocket, I'll be the air
Scoop me up and call me a lady

I've been waiting all of my life
This love is for sure, forever more
Just as long as your hand is in mine
So when you go into a storm, I will be there
Protect you
I will shoot the wave down, I'll come around
Surround you
It's a light I've never shown, I will be there
Lighter than a leaf in your pocket
I'll be the air
And when you smile, I will be there
And when you cry, I will be there
Lighter than a leaf in your pocket, I'll be the air
lighter than a leaf in your pocket
lighter than a leaf in your pocket
lighter than a leaf in your pocket.....
