

# Trip Switch

## Nothing But Thieves

Sharing secrets with another world  
Rubbing shoulders with some unknown lovers  
    Making waves through the universe  
Starting wars with anonymous brothers  
    Trip  
        Switch  
        Trip  
        Switch  
    Make a wish and I'll count to three  
    Press the button and we'll both be happy  
        Sending signals is a dirty trick  
    I get my love in a digital package  
        Trip  
        Switch  
        Trip  
        Switch  
    What we do when the power's out  
    What do we do when the lights go down  
    What we do when the power's out  
What do we do when the lights go  
    Down, down, down, down  
        Down, down, down, down  
        Gimme data 'cause I need a hit  
How I love stratospheric numbers  
    Information, I've been craving it  
        Gimme yours, then gimme all the others  
        Trip  
        Switch  
        Trip  
        Switch  
    What we do when the power's out  
    What do we do when the lights go down  
    What we do when the power's out  
What do we do when the lights go  
    Down, down, down, down  
        Down, down, down, down  
        They put out the lights  
        They put out the lights  
        They put out the lights  
    What we do when the power's out  
    What do we do when the lights go down  
        What we do when the power's out  
        What do we do when the lights go  
        Down, down, down, down  
        What we do when the power's out

What do we do when the lights go  
What we do when the power's out  
What do we do when the lights go  
Down, down, down, down, down  
Down, down, down, down, down

When the lights go down
