

We Haven't Changed

Slowtide

Stone cold, is the heart you hold,
and you talk like a queer
said you're blooming virtually,
well you don't look that good to me
Once more you're looking for
escape from the fear
but it's stuck on your back,
the anxiety attack I know the secret you are keeping from me
we feel the same because we want to be free
So let us find out that we haven't changed
let us find out that we haven't changed
let us find out that we haven't changed at all Pitch-black running down your back
is the feeling of shame
and you're locked from inside,
blindly craving for some pride
downhill, and dressed to kill,
you don't look like yourself
leave the past to the past,
take a look outside at last
I know the secret you are keeping from me
we feel the same because we want to be free So let us find out that we haven't changed
let us find out that we haven't changed
let us find out that we haven't changed at all
