Bicycle Song

Orbit

Kelsea, won't you come out to play
I got my bicycle today
My father bought it for me
He said it cost him money
He's got a man in China
Who says he gets them cheaply
It's got a magic handle
It's got a chromed up fender
It's got a sprocket card and
It's got some superpowersWhat a pretty bicycle she said
I want one just like thatAmiri won't you hear my song
I make it up as I go along
It's about a man in China
Who's got a wife and family
He sells his stuff for money
To feed his starving family
They got them fifteen babies
There's not a girl among them
He's got some super powers (2x)What a pretty song he said
I want one just like that (2x)Kelsea won't you come out tonight
Your body's burning just like mine
These are the things I bought you
These are the words I taught you
You've got a phony body
I want to touch so badly
I want to get so dirty
I want to give you money
I want to take your body
Tell me, I'll knowwhat a pretty song she said
I want one just like that(2x)
