

# Lobotomy

## The Ruts

I've seen you fighting through the time  
I've followed your steps full of pain  
Unnamed hero that's challenged the human ego  
Victim of cowardice  
Of strong manipulation  
A system that was made to lie and to deceive  
Screams of agony  
Satisfy the proud  
But these screams still echo inside the conscience  
Contradiction, aggression, desolation, illusion  
Nonconformity  
takes my mind  
Too much injustice to forget so fast  
My disgust is greater than my compassion  
Feel the pain upon your final hour  
Self-blame can't hurt me  
Eye for an eye  
You receive your just reward  
Now I'll live my life with indifference  
I've tortured without remorse  
I've slaughtered without fear  
Brain killing brain  
Brain killing brain  
Brain killing brain  
Brain killing brain
