

# End In Sight

## Knucklehead

Wake up kid you got a situation  
It's time to adjust those expectations  
Two years back, you had it made  
Now just lucky to be getting paid

We're all alright, we don't give learn much without a fight  
We're all alright, we'll all forget with the end in sight

When you got no money and you got no job  
The bailouts feel like you're being robbed  
They teach no class like this in school  
Where all the best and the rest are fooled

We're all alright...

One more time around we go  
What comes next nobody knows  
Maybe next time we'll crash and burn  
Maybe this time around we'll learn

We're all alright...

---
