

Sparks Fly

Anastasia A

I look at both of us
I see so many things; I'm seeing every thing (everything)
It's so funny how things can change only a matter of time
I just needed some time with you as you stand by my side
You make me believe in love, we survived
It's not so bad
We made it out
sometimes hanging on deserves no doubt Sparks fly
It's like no other feeling
When my heart smiles
Every time I see your face
I forget all about the worries of the world
When those sparks fly (yeah)
Whoah, whoah, whoah, whoah x2 could it be the sun
Could it be the heat?
the way you look at me
My heart it skips a beat
I pull you closer and closer my love won't fade away
Our storm had its rain but that was yesterday Sparks fly
It's like no other feeling
When my heart smiles
Every time I see your face
I forget all about the worries of the world
When those sparks fly (yeah)
Whoah, whoah, whoah, whoah x2 Off away we go
On another mission
Sailing off to another destination
It doesn't matter where
Don't ask questions why
As the morning, morning turns into night Whoah, ooooooh ohhhh woah oh oh
Whoah, ooooooh , ooooooh woah oh oh Sparks fly (sparks fly)
It's like no other feeling
When my heart smiles (heart smiles)
Every time I see your face
I forget all about the worries of the world
When those sparks fly (yeah)
Whoah, whoah, whoah, whoah x2
