Blackout (feat. Steph Jones) [Cyantific Remix]

Tritonal

Two hungry hearts, a city divided.
Pulled in the dark, so strong it was violent
Yeah it was, you and me, you and me, against the world
It was, you and me, you and me, against the world
Don't you worry, baby, there's a fire for us
No were not going down in a blackout
And if the stars above me crumble into dust
No, were not going down in a blackout
Systems down, the system's down but we made light in a blackout. Systems down, the system's down but we made light in a blackout
Oh no no no, the waves on the wire
Streets growing cold, cold but we burn, burn brighter
Cause it's like you and me, you and me, against the world
It's like you and me, you and me, against the world
Don't you worry, baby, there's a fire for us
No were not going down in a blackout
And if the stars above me crumble into dust
No, were not going down in a blackout
We made light in a, in a...
Going down, going down in a blackout
In a, in a...
