Nights Like These

Big Tobz

Nothing less man she keeps it one hunna
I can't wait to take her to my mumma
Taking trips round the world we some tourists

I used to dream about nights like these
Take you round the city ima show you what this night live means
Take a selfie for your Twitter make the timeline see
It's you and me against the world I need you right by me
Girl I need you right by me
I used to dream about nights like these
Take you round the city ima show you what this night life means
Take a selfie for your Twitter make the timeline see
It's you and me against the world I need you right by me
Girl I need you right by me

Yo
Uh
She a good girl
But secretly she love a savage
But she don't ever question about a fucking balance
Man could never call my girl
An uckers badders
Dawg you need some fucking manners
Every F-boy needs a bad b to spent on
But she makes her own
Ain't no man she depends on
Lady in the streets
In the bed she can tek what
Shawty blow my mind that's a headshot
She don't need to trap me she can have my pickneys
Prestige I could never take my gal to dixies
Minimum T-G-I or Nando's
I don't need to splash
But I does it cos I can doe
Man ain't got the license yet
My gal already whipping foreigns
Everything she got she own
Trust me none of this shit is boring
So why the fuck would I be linking boches

You can be my lira
I'll be Ricky Rossing
She don't even mind a chill and Netflix
And she ain't got no time to ring her exes
Might buy her a diamond ring and necklace
But she just want my time and my attention
Gotta couple tatts she can only show me
And she loyal in the interviewing room she won't speak
That's why she my lover, my bestie, my codie
That's why she my lover, my bestie, my codie.

I used to dream about nights like these
Take you round the city ima show you what this night live means
Take a selfie for your Twitter make the timeline see
It's you and me against the world I need you right by me
Girl I need you right by me
I used to dream about nights like these
Take you round the city ima show you what this night life means
Take a selfie for your Twitter make the timeline see
It's you and me against the world I need you right by me
Girl I need you right by me

When you waking up
Breakfast it already made for you
Look to your left that's an amazing view
You said you want a soldier, b I'm trained for you
Even tho the money calling
Ima stay for you
You are star, my mumma always told me aim for you
For this moment I've been waiting
This is patience due
Don't worry bout them hoes
Don't let them hate on you

She my bestie, my codie, my lover
Nutting less man she keeps it one hunna
She my bird man, I swear she a stunner
Can't wait to take her to my mumma
Me and you back to back in them foreigns
Taking trips round the world we some tourists

I used to dream about nights like these
Take you round the city ima show you what this night live means
Take a selfie for your Twitter make the timeline see
It's you and me against the world I need you right by me

Girl I need you right by me
I used to dream about nights like these
Take you round the city ima show you what this night life means
It's you and me against the world I need you right by me
Girl I need you right by me
