Confused

Lou Barlow

I've been up, down, knees, cloud
Fading into view
Rise and fall, don't we all
Love to be confusedMake it natural naked fun
Force it make it wrong
Wait a day, a year, far too long
Don't you feel abused?Drifting through the night
Nodding at the moon
Waited till the day
Withdrew, confusedAre you here to give it back?
Are you afraid I won't let go?
That I'm a warm denier, a cold desire
Remote without controlCross the border through
Your room and into mine
If there's something you want
Let it tell you what to do
Tonight let's feast on you, confused
