

Close My Eyes

Matisyahu

See no matter where I am bless me with all your light,
I'm on a train brain vexed connect and the I feel blessed
Whether day or night I'm on the street midtown New York City
Let me stop praise your name I need room to breath
I want to feel your ease; I got to feel your peace
Screaming' down on my, because my insides bleed
My hearts on fire witnessed all the vampires
Yes I came hear on a to inspire Close my eyes and take a ride inside
Feel the breeze blow by, I'm getting' you high
Bob Nesta said it best everything will be all right
Introspect connect the sect's and let this music make you fly Close my eyes and take a ride inside
Feel the breeze blow by, I'm getting' you high
Bob Nesta said it best everything will make I listened' to the wind whistle in a channel of sound
My ear like a vacuum begin to boom
Glisten like the sun heats a drum,
Cursing' all of them doomed rising' up from the ground
Growing full like the moon
I'm planting like a seed yes sir
Them get up and get up and grow and I'm firm like a tree,
Well I know that's all I know,
That some their colors wonderful like it was a rainbow
Let me tell you one time if you didn't know Close my eyes and take a ride inside
Feel the breeze blow by, I'm making you fly
Make, making you fly, make, making you fly
Make make you fly, make make fly Close my eyes and take a ride inside
Feel the breeze blow by, I'm getting you high
Bob Nesta said it best everything will be all right Me see you run, run, run but you could not hide
I know I'm crazy mothers would never run from inside
And try to keep me down, them a sin on Jah
An' dem know! That them folks, put 'em in a fire
They just type and can't see, open up your eyes
Every politician is a human in disguise
They say them a tease and the waves is rough,
And it won't come my way
Hop in the zed, and jump to time to work and it nah time to play Close my eyes and take a ride inside
Feel the breeze blow by, I'm making you fly
