

Please Don't Go Away

Johnny Tillotson

Please don't go away (little girl, won't you stay?)
Let me hold you in my arms (little girl, won't you stay?)
 Let me kiss your lips and thrill to your charms
 Please don't go away
Please don't go awayI could never find (little girl, little girl)
 find a precious love like yours (little girl, little girl)
 Won't you hurry to my arms and stay
 Please don't go away
Please don't go awayIf I could call you mine little girl very dream I'd dream would then come true
 loving you, little girl
 If only you would care, say you care little girl
 Please tell me that you'll stay
 Please don't go away
Please don't go away[piano]If I could call you mine little girl very dream I'd dream would then come true
 loving you, little girl
 If only you would care, say you care little girl
 Please tell me that you'll stay
 Please don't go away
Please don't go awayPlease don't go away
 Please don't go away . . .
