

Breathe

Breathe

i climb, i slip, i fall,
reaching for your hands but i
lay here all alone sweating all your blood
if i can find out how to make you listen now,
because im starving for you here with my undying love,
and i, i will

breath for love tommorow cause theres no
hope for today, breath for love tommorow
cause maybe theres another way,

i clim, i slip, i fall
reaching for your hands but i lay here all alone
sweating all your blood
if i can find out how to make you listen now because
im starving for you here with my undying love
and i, i will

breath for love tommorow cause theres no hope for today
breath for love tommorow cause maybe theres another way (x2)

i climb i slip i fall
into your empty hands
but i lay here all alone
sweating all your blood
