I miss you

Nomy

I still see you and me (and me)
You've been gone now to long, to long
But I miss you
There's no one to save me now
I'm standing on the edge
and still I wonder howGod I miss you. God I miss you
I'm broken deep inside
Your face infront of me
My heart is open wide
God I miss you (God I miss you x3)God I miss you (God I miss you x3)God I miss you (God I miss you)
I miss the time when you were here
Now I'm lost in darkest fear
and my end is getting near
God I miss you (God I miss you)
I miss your soul I miss your eyes
You were strong and free from lies
God I miss your lovely eyesI keep falling to you and me
The edge is gone now
No fear, no fearGod I miss you (God I miss you)
I miss the time when you were here
Now I'm lost in darkest fear
and my end is getting near
God I miss you (God I miss you)
I miss your soul I miss your eyes
You were strong and free from lies
God I miss your lovely eyesGod I miss you (God I miss you)
I miss the time when you were here
Now I'm lost in darkest fear
and my end is getting near
God I miss you (God I miss you)
I miss your soul I miss your eyes
You were strong and free from lies
God I miss your lovely eyes
