

# bigcitydreams.

## Never Shout Never

You say were both little people and you like that way  
But in time Im gonna put this body to shame and grow old  
And wear a suit like my old man  
Pack up all my things and get my ass out of town.

We got it good,  
whether you like this town or not  
I know its small but with a big head its bound to get hot  
In the summer but the summer is a bummer  
If you cant leave this pathetic excuse for a town

Where it holds all your memories  
A life time of crushes and your broken dreams  
To be anywhere but here,  
But baby anywhere is away for me

and yoooo  
If you got it all figured out  
Then what is there to shout about?  
This midwest town is gonna miss you

Just go ahead and work it out  
But first come on and let it out  
Scream and shout and tell everybody that your gonna leave

In about one year you'll have it all figured out  
These big city dreams  
and what your about  
walking like strangers among these states  
Only time will tell how long I can wait

We got it good,  
whether you like this town or not  
I know its small but with a big head its bound to get hot  
In the summer but the summer is a bummer  
If you cant leave this pathetic excuse for a town

Where it holds all your memories  
A life time of crushes and your broken dreams

To be anywhere but here,  
But baby anywhere is away for me

and yoooo  
If you got it all figured out  
Then what is there to shout about?  
This midwest town is gonna miss you

Just go ahead and work it out  
But first come on and let it out  
Scream and shout and tell everybody that your gonna leave

Leave again, oh so casually  
Would you take the hit for me  
or the home team

And whoooo  
If you got it all figured out  
Then what is there to shout about?  
This midwest town is gonna miss you
