

You Looking At Me

[Samiam](#)

You've got it all between your fingers
What you want you just can't grab
You want it all, do what you want that you can't have Sand sifts through with my disgust
With my sympathy, chains lay in rust
You want someone to hold you together
But you're strong, you're way too proud You want someone to be around
What you want, you need none
Sand sifts through with my disgust
With my sympathy, chains lay in rust It's old, it's dirty, it's cold outside
It's lonely, it's ugly, it's all around
It's old, it's dirty, it's cold outside
It's lonely, it's ugly, it's all around You've got it all between your fingers
What you want you just can't grab
You want it all, do what you want, you can't have
