

Any Number Can Play

No Use for a Name

They will mislead you, plug in and bleed you "Swallow temptation", believe the answer I swear I heard the DJ
say Is in the order you obey I know my purpose isn't on a poster sign I'm still part of the game that any number
can play Majority vote, identity? No! Industry living by disease Immunity lost, full price at your cost Top forty
reasons to spoon feed Any number can play A dream a nightmare couldn't change Imagine, idolize and idealize
The sound remains unclear, Looks like somebody made our mind There's little left to hear except contradiction
When history repeats the hit that I've heard for my whole life Bring back request to radio, Your favorite song
was written but you'll never know A selection for us to see a blind conspiracy Another version of the imitated
tune and not one soul was saved Any number can play
