

Dream Machine

Daniel Ash

I know this little boy
That lives inside your head
I know the little boy
That lives inside your head
Just dreams of the bright blue stars
That shine up in the sky
Just dreams of your sorrows
When you live another lie The dream is all around you
It comes and it will go
This dream is all around
It comes and it will go This God is a good one
This God is the best
This God is the good one
Just forget all the rest I know this little boy
He lives right inside your head
I know this little boy
I know he lives inside your head
Just dreams of the bright blue stars
That shine up in the sky
Just dreams of your sorrows
Then you live another lie The dream is all around you
The dream it comes
This dream is all around you
The dream it comes and comes This God is a good one
This God is the best
This God is the good one
Just you forget all the rest
All the best
