

You And Me

Kitty Wells

You and me together life's a pleasure
But without your love life's not complete
And I feel the same about you, darling
We belong together you and me We'll share love's joy and life's sorrow
You belong to me I belong to you
When you hold my hand the sun shines brighter
When you smile at me I lose my blues You and me together life's a pleasure
But without your love life's not complete
And I feel the same about you, darling
We belong together you and me Don't ever let nothing come between us
Think our lonely life apart would be
Gossiping tongue can never change me darling
Your love means more than life to me
