

# My Atonement

## Sodom

We worship our abomination of desolation  
With fire, blood, swords and reverence  
See that hour blessed splendor in my name  
War engines and battles of conquest are atheistsGlory in the highest heaven  
Hear my atonementWe will return to the victorious city  
For a proof to the world  
Support us, be ready to fly or to smite  
Gimme the sign of silence after the adorationVerily you shall not die but live on console  
Caressed by magnificent beasts of women  
Unassuaged of purpose, delivered from lust  
Not hell's heart hath so noxious a shadeHear my atonementBehold the flame burn in every heart of man  
There is knowledge at a core of every star  
As brothers fight keen, proud and royal  
Law is the word of god enthroned as precious waterHis enemies tribulate of ordeals are mere liars  
Despise also all cowards who dare not fight  
Exhausted is help and hope of wisdom  
There is no law, do what you will
