

Shoot It

David Lee Roth

Well, look at me
Got me in her sights
Is this a blessing in disguise?
Fatality on a Saturday night
Right between the eyes Well honey, I know you never satisfied
Just a paradise on a roll
Come to take the fat chance this ain't suicide
Sit back and let it all unfold, you better Shoot it, shoot it
Come on baby put your best shot on me
Shoot it, shoot it
Girl you got to do it for a friend in need Shoot it, shoot it
Beggars can't be choosers in a den of thieves
Is it good for you, 'cause it's good for me How's your love life, how's your sister, ooh, I can't resist
Is this the one that get away?
Well, I can tell ya my friend
That it's all how much you spend, baby
Not how much you make You say you don't wanna dance, honey listen to me
Shut yo' mouth and hit the floor
And you can tell 'em last night that you was blind to see
And blame it all on rock 'n' roll, you better Shoot it, shoot it
Come on baby put your best shot on me
Shoot it, shoot it
Girl you gotta do it for a friend in need
Maybe they are talkin' about me, baby Shoot it, shoot it
Beggars can't be choosers in a den of thieves
Is it good for you, it's good for me Dressed to the nines
Don't cry wolf too many times, baby
But you can trust in me
Want some good clean fun?
Well, I heard you play with guns
And I see you got a vacancy You say you don't wanna dance honey listen to me
Shut yo' mouth and hit the floor
And you can tell 'em last night that you was blind to see
And blame it all on rock 'n' roll Shoot it, shoot it
Come on baby put your best shot on me
Shoot it, shoot it
Girl you gotta do it for a friend in need Shoot it, shoot it
Beggars can't be choosers in a den of thieves
Is it good for you, 'cause it's great for me You pull yo' gun, you better Shoot it, shoot it

Come on baby put your best shot on me
Set 'em up, shoot 'em down
Shoot it, shoot it
Girl you gotta do it for a friend in need
A friend in need, I love ya honey Shoot it, shoot it
Beggars can't be choosers in a den of thieves
Is it good for you?
It's unbelievably spectacular from over here, baby
