

# Biomech II

## Allegaeon

God damn you

Tissue for the harvest extracting cells  
clustered genetic samples fuse bind and meld  
navigation of creation advanced reparation  
to make the sick whole by the printing of organs  
engaging life enhancement medical advancement  
a new state of praxis mortality bereavement  
time still passes and the nation refuses  
humanity wasted on a contradicting point  
to be a more caring god intelligent by our design  
to be a more caring god to prove ourselves divine  
replication no rejection as yesterday's science fiction  
now today's science fact printing your biomech  
Impede the progress profess the regress  
based on archaic fiction advancement interdiction  
proclamation of holy law harm the meek you claim to serve  
force fed by the spoon of flaw your fallacy preserved  
to be a more caring god intelligent by our design  
to be a more caring god to prove ourselves divine  
replication no rejection as yesterday's science fiction  
now today's science fact printing your biomech  
as the masses prayed her flesh decayed  
holy crusades sent to restrain  
as the masses prayed his health degrades  
none of them were saved  
so what'd you do so what'd you do  
with your god the fat you chewed  
and from his silence to your faith infer  
to split the hair and watch them suffer  
god damn you  
state of affliction derails your conviction  
by the man at first who wasn't sold  
your position faces the opposition  
now a victim of your misguided mold  
to be a more caring god intelligent by our design  
to be a more caring god to prove ourselves divine  
replication no rejection as yesterday's science fiction  
now today's science fact printing your biomech
