

My Love

Cher

And when I go away
I know my heart can't stay with my love, its understood
Everywhere with my love, my love does it good, woah
My love, oh with my love, my love does it good And when the cupboards bare
Ill still find something there with my love, its understood
Everywhere with my love, my love does it so good, woah
My love, only my love, my love does it good Only my love, only my love
Only my love, hold the other things to me
Only my love, only my love
Only my love does it good to me Everywhere with my love
Dont you see my love, it does it so good
Only my love, only my love
My love does it good Dont ever ask me why
I never say good bye to my love, its understood
Cause everywhere with my love, my love does it good
Only my love, only my love, my love does it good
Only my love, only my love does it good to me, woah
