

You Could Have It All

CSS

You could have it all, you could have it all
But then what's left for me
You could have it all, you could have it all
But then what's left of me We met in the music shop
There were playing our favorite band
After years of walking hand in hand
We were too busy to hang with our friends
You look at me like you have no other option
You forgot how we even got in here
You look near like I'm your favorite person
But you forgot what means [Are you kidding me?] You could have it all, you could have it all
But then what's left for me
You could have it all, you could have it all
You could have it all, you could have it all
But then what's left of me Uninspired in so many ways we parted
This sucks, her my little bird
I'm too young to feel like an old lady
Yes sir, no sir, what an absurd You look at me like you have no other option
You forgot how we even got in here
You look near like I'm your favorite person too
But you forgot what favorite means You could have it all, you could have it all
But then what's left for me
You could have it all, you could have it all
But then what's left of me Oh no, here he comes bringing miracle love
Oh no, there he comes making so much fun
Oh no, here he go try to fix it up
Oh no, here you go You could have it all, you could have it all
But then what's left for me
You could have it all, you could have it all
But then what's left of me
