

# When You're Around

## Frankmusik

When you're around  
Everything's fine  
Go to town and get quite drunk  
Throughout the night we'll be alright  
Cos I'm never down  
When you're around  
Down down down down  
When you're down,  
When you are when you are around  
I'm never never down When you are when you're around  
You make time but drive past  
Moments seem to go so fast  
Holding my hand  
Can't quite understand why I'm never down  
When you're around down  
Round round round When you are down when you're around  
I'm never never down  
When you're  
When you're around When you're around life is the best you make me stand any test  
Cos for the rest of our days  
When you're around round when you're  
When you're around round round round  
When you're down  
When you're around when you're around I'm never never down  
When you're  
When you're around
