

Get Down With Me

Spice Girls

Let me tell ya 'bout the night I wanna have
Gonna show ya how you're gonna make it last
Are you ready when I'm takin' it too fast?
Just for me what I need and release a part of me
So tonight gonna take you on a ride
And you better make it right
'Cause tonight there's only one thing on my mind
And you'll find out just in time
If you knew just what plan I has got in store for you
You wouldn't leave the room until I am through
I'm tired of being undercover, it's time to be your lover
So get down with me
Let me know what is going through your mind
Does it show how I'm feeling deep inside?
Hold me close, now that you know how it goes
We can do it again and this night will never end
So tonight gonna take you on a ride
Oh, you're gonna make it right
'Cause tonight there's only one thing on my mind

And you're gonna find out tonight
If you knew just what plan I has got in store for you
You wouldn't leave the room until I am through
I'm tired of being undercover, it's time to be your lover
So get down with me
Now that we have been together for a night
It's time that you and I to say goodbye
Don't try to hold on to this moment
'Cause when you wake up I'll be gone, yeah, yeah yeah
If you knew just what plan I has got in store for you
You wouldn't leave the room until I am through
I'm tired of being undercover, it's time to be your lover
So get down with me
If you knew just what plan I has got in store for you
You wouldn't leave the room until I am through
I'm tired of being undercover, it's time to be your lover
So get down with me
