

# Rabid Dog (Ewloe Demo, March 1998)

## Super Furry Animals

Energy, energy, burns like a blister in acid bath  
It's a violent, violence, hyperactivity aftermath  
Any second now, I was start to endlessly convulse  
Like a renegade resurrect little men called?  
Cuttlefish, cuttlefish, ain't like a fish when I saw you  
There's an octopus hard for action, or is that just me?  
I'm a rabid dog, with a licence from God to chew and chew  
I'm a doughnut brain, doughnut brain, boiled with the traffic just slightly  
Through  
And then you came into my life  
And not everything was uptight  
Now you're shining a light at our path  
And then you came into my life  
And now everything seems just right  
And you're shining a light on our path  
Our old man, our old man feel jitter courage when on the run  
Are you booger man, Malibu, prowler, mystery, piece of fun?  
Along with third world debt you're the kind of friend to give me sleepless  
Nights  
With a chemical, chemical hungry for mosquito bites  
And then you came into my life  
And not everything was uptight  
Now you're shining a light at our path  
And then you came into my life  
And now everything seems just right  
And you're shining a light on our path  
(You came into my life  
And where everything was uptight  
Now you're shining a florescent light on the world now) (X2)
