Come Around

Rosi Golan

So high tonight
And I don't feel like coming down
I could lie to you all my days
But you're the one, you're the one
And I'm a fool for waiting so long to let you know
Come around, come around, come around, come around to me
There's something in between you and I
Come around, come around to me, you feel like breathing
Come around, come around, come around, come around to me
Like sunlight won't you come
Lay your ray down, you're the one
I could run, I could run for the life of me
But where would that get me? Where would that lead?
I'm a fool for waiting so long
Come around, come around, come around, come around to me
There's something in between you and I
Come around, come around to me, you feel like breathing
Come around, come around, come around, come around to me
Can't you see
You're my life, life
Ha, ah, ah, ahh
Come around, come around, come around, come around to me
Come around, come around, come around, come around to me
Come around, come around, come around, come around to me
There's something in between you and I
Come around, come around to me, you feel like breathing
Come around, come around, come around, come around to me
Come around, come around, come around, come around to me
Come around, come around, come around, come around to me
Come around, come around, come around, come around to me
Come around to me
