

Real Thing

Boys Like Girls

Jamie's in love, she's got the summer blowing through her hair
She turns it up, she says, "Tonight, you'll take me anywhere"
Bobby's in luck, he's got a fire burning in his eyes
He turns it up and he says, "Girl, you better hold on tight" 'Cause this is the real thing, love changes everything
This is the night when every heart's exploding
The real thing, slow down, it's happening
'Cause you got time to burn in the heat of the moment That summer radio, fireworks off the patio
3 a.m., string of green lights in a row
And the real thing, love can change anything
If you can just let go, let's go Jamie's alive, she's got it rushing through her veins tonight
So leave the lights, it feels too good to have to say goodbye 'Cause this is the real thing, love changes everything
This is the night when every heart's exploding
The real thing, slow down, it's happening
'Cause you got time to burn in the heat of the moment That summer radio, fireworks off the patio
3 a.m., string of green lights in a row
And the real thing, love can change anything
If you can just let go, oh Can't put the brakes on this runaway train, let's go
This is the heartache that won't go away Jamie's in love, she's got the summer blowing through her hair 'Cause
this is the real thing, love changes everything
This is the night when every heart's exploding
The real thing, slow down, it's happening
'Cause you got time to burn in the heat of the moment That summer radio, fireworks off the patio
3 a.m., string of green lights in a row
And the real thing, love can change anything
If you can just let go, just let go Jamie, just let go, oh
