

I Will Trust You, Lord

Bruce Frye

Verse 1

It's funny how we do it, compartmentalize
We plan for success and try to pass the pain right by
But it just doesn't work that way
God has a different plan
He works in ways we've never seen
Beyond the scope of man

Chorus

When the journey takes a detour, unexpectedly
And I try to accept and understand what it all means
When I'm pressed to show the world what I really believe
I will trust you Lord
When my heart begins to faint because I see a life so frayed
And my soul cries out "O Lord how long can I keep this at bay?"
In the fiercest part of battle when my feet don't want to stay
I will trust you Lord,
I will trust you Lord,
with my life

Verse 2

I may not understand it, And even question why
"What good could ever come from this" has even crossed my mind
But God's teaching me to trust him more as He works His will in me
I rest securely in His care and surrender sure is sweet

Chorus
