Eon

Supergrass

I know you're out there
We saw a shooting star
We don't know what you've done
You're nearer for a starNow we know it
We don't know who you are
We don't know what you've done
You're nearer for a starWe're slowly fading
Your glow is almost gone
We don't know what you've done
You're nearer for a star
