Night And Day

Hot Chip

The way I feel about you baby,
In the middle of the night
There's just one thing that I can do
To make me feel alright
The way I feel about you darling
In the middle of the day
There's just one thing that we can do
To push the pain away
Let's sway, let's sway
Let's sway, let's sway
Night, day, night, day
Night, day, night, day
You got me working night and day
Night, day, night, day
Night and day and night and day
If I can feed this hype you're making
It would make the world alright
The walls that form around ourselves,
Will celebrate our lives
If I could be inside you darling
And the center of your life
I'd write the wall upon the page
We're living under skies
Let's sweat, let's sweat
Let's sweat, let's sweat
Let's sweat, let's sweat
Let's sweat, let's sweat
(You know I'm thinking about you)
Night & day & night
(You got me working)
Night & day & night
(You got me working)

Night & day & night
(You got me working)
Night & day & night
Let's work it
You want me
Just hold me

Come on
I don't got no Abba
I don't play no Gabba
I like Zapp not Zappa
So please quit your jibba jabba
I've just lined up Macca
When you're in Aiya Napa
Do I look like a rapper?
Do I look like a rapper?
(You know I'm thinking about you)
Night & day & night
(You got me working night and day)
Night & day & night
(You got me working night and day)
Night & day & night
(You got me working night and day)
Night & day & night
(You got me working night and day)
Night & day & night
(You got me working night and day)
Night & day & night
(You got me working night and day)
Night & day & night
(You got me working night and day)
Night & day & night
You got me working night and day
