Antisocial (feat. Mylah)

Gucci Mane

Baby, you don't have to treat me all anti
Why you wanna put me on standby?
I can't lie, girl, you're hotter than a campfire
We can stay up all night like vampiresCompliment each other like burgers and French fries
In the last minute I done thought about you 10 times
Fine on the out but she pretty on the inside
And ever since she left it's like my heart diedBaby, I think you can bring out Gucci's other side
She said, "How don't you trust me, you did a homicide"
Then said, "I got a boyfriend who I can't put aside
Even though the grass so much greener on the other side"And every man like what he can't have
It's funny but I can't laugh
Baby girl, so bad, dis me but I ain't mad
Why you wanna tease me?
You should wanna squeeze me
Homie ain't the kid, baby, he could never be meHow you wanna go and act anti-social
Bet your man don't know you like I know you soldier
Maybe one day, babe, you gon get your mind right
And if you looking for me you can find me in the limelightYou don't have to treat me all anti
Why you wanna put me on standby?
I can't lie, girl, you're hotter than a campfire
We can stay up all night like vampiresCompliment each other like burgers and French fries
In the last minute I done thought about you 10 times
Fine on the out but she pretty on the inside
And ever since she left it's like my heart diedOnce upon a time, a long time ago
I had a bitch but she felt she had to let me go
Called me out 'cause she can't buy cheap shit
Yeah, you got talent but I'm a bad bitchNow when I see her shorty whole swag switched
I walk right by her like she don't exist
Her car broke down and it can't get fixed
Her swag broke down and her bag counterfeitThat's not Gucci, baby, that's floochy
Remember 2000 you was acting all boozie
9 years later and you're best friend choosy
I scooped her in my phantom and I took her to the moviesGucci don't gotta act anti
Told her she can have me when she want
That's when she fantasized
Told her that I can't talk to her 'cause I got that man pride
Ever since I left, baby girl, told me her heart diedYou don't have to treat me all anti
Why you wanna put me on standby?
I can't lie, girl you're hotter than a campfire

We can stay up all night like vampiresCompliment each other like burgers and French fries
In the last minute I done thought about you 10 times
Fine on the out but she pretty on the inside
And ever since she left it's like my heart diedExcuse me if I sound a little crazy
But I just wanna be good to my baby
'Cause he been holding me down
And he be putting it down
He give me everything, I don't need no one aroundBut you're saying you can give it to me better
Give me hot like it's July and I'm rockin' a sweater
Just for hitting the road, would you women let go
Say you got 20/20, her man's 2004Maybe I'll give you a try
And keep it low
Let you ride
Something like, a test drive
See, baby, I ain't so antiBaby, you don't have to treat me all anti
Why you wanna put me on standby?
I can't lie, girl you're hotter than a campfire
We can stay up all night like vampiresCompliment each other like burgers and French fries
In the last minute I done thought about you 10 times
Fine on the out but she pretty on the inside
And ever since she left it's like my heart died
