

# The Science of Horror

## Nocturnus

FEAR!!!

OF THE UNKNOWN!!!

FEAR!!!

OF THE UNCERTAIN!!!

Haunted, Plagued by horror from the beyond

Hideous Forms, emanating figure, that lurks in the black

Nightmare, visios from the dephts of ypur mind

Lost... left without way... standing, standing aloneFallen, spiraling down, erratically, a labyrinth of time

Silence, tongues in this realm. Speechless, words that have no sound[Chorus]

Burning, at the stake like a witch

Drowning, oh my god. I can't get a breath

Torn apart, on the rack, no one will help

Sharp teeth, dig deep in the skin

Falling, smacking the ground, shattered to bits

Fear not my bladeHunting for the next one

I search for the scent

Your life my essenceI am the conqueror

I am the one you fear

I am atrocity

Unbelievable sickness

In my mindDon't worry. I will keep you

Forever, and never

I, have a place

Safe, No one will hurt you hereYou can't fathom these things in your mind

Feeble minded

I am a higher grade, sentient creature

You will never know

What I'm made ofIt is imperative that I kill

Otherwisetheymaysimply,neverunderstandme

I will show them
