

When We Drive

Death Cab for Cutie

I cant expect you to be honest
Or to be faithful every day 'til the end
I just need you to be always a friend
As the sun sets over Dakodas
Underneath a crimson ocean of sky
Know I'll always want you by my sideWhen we drive(x2)You and I were born in motion
Never in on place for to long of time
Now its the only way we know to survive
I like the way that your hair tangles
The way your sun tan's only on one side
You always keep the windows open wide
When we drive(x2)
When we drive(x2)
Climb into the back seat and close your eyes
I've got the wheel
Dream of all the places only we will find
Can't expect you to be honest
Or to be faithful every day until the end
I just need you to be always a friend
Until the engine kicks and sputters
Until we roll the rubber off the tires
Know I'll always need you by my sideWhen we drive(x2)
When we drive(x2)
When we drive(x2)
