Body Voltage

Subvision

I'm the dynamite with the shortest fuse
And I've got an itch to let it loose
Like a prisoner in this mundane hour
My body screams to turn on the power
These volts are even ticklin' my loins
I feel like kickin' in some groins
Sparkling brainwaves are heatin' up the steam
If it only could get unleashed with the cream
And I can't fuckin' get rid of this suffocate feelin'
So a total snap seems so appealing

Increasing the action
Turning on the groove
If you get it it's yours to prove
Now fuckin' move!
Body voltage!

I've been thirsting dry to let go of the brakes
Definitely burstin' as I've snorted the flakes
And as far as I know I'm tonight's attraction
Just let it flow
Let's see some action!

I'm no longer trapped in that bore abode
But as a ton of bricks I encounter the road
Feel my body rage in overload

Thrown back into everyday life depression
Discharged from my recent outburst session
Now I am tryin' to avoid the deep simplicities
Cuz I know in my veins runs wild electricity

Forever achin' with a riot lust
Always to be doing the pelvic thrust
Now fuckin' crust
Body voltage!
Body voltage!
