Waved On

Engineers

Standing still
But you've had your day
Had the face
But you won't stay
Slowed down, weighed down
Right into me, it's not right
Waved on, helped on
Right into you, goodbye
Read your mind
But you have your needs
Hopeless times
But you are so pleased
Slowed down, weighed down
Right into me, it's not right
Waved on, helped on
Right into you, goodbye
Slowed down, weighed down
Right into me, it's not right
Waved on, helped on
Right into you, goodbye
[Incomprehensible]
