I'm In It With You

Loreen

[Loreen]
You took a shot, it took you down
But not a single drop of blood fell
They hit your heart, they took it out
And left you bleeding in a dry spellWhat were you thinking?
Why did you let go?
I was still haunting you
What were you thinking
Why did not i know?
When I was right there with youIf you'll ever fall, I'll lift you up
If you lose your way, I picked you up
And I'm in it with you
And I'm in it with youIt took a blade, it went in deep
And it was tearing up inside you
Must've been sharper underneath
Cause there were scars I couldn't undoWhat were you thinking?
Why did you let go?
I was still haunting you
What were you thinking
Why did you not know?
When I was right there with youIf you'll ever fall, I'll lift you up
If you lose your way, I picked you up
And I'm in it with you
And I'm in it with youNow you took a shot
And I'm in it with you
And I'm in it with youIf you'll ever fall, I'll lift you up
If you lose your way, I picked you up
And I'm in it with you
And I'm in it with youIf you'll ever
If you'll ever
And I'm in it with you
And I'm in it with you, you
