

Flashover

Klaxons

Myriads of silver discs
Signals have been noticed
Out on the drift Here comes the flashover
From our new neighbor
Here comes the flashover
Behold new colors Messages, fresh images
The over mind
Has noticed another shift Never seen before
Others bring new dawns
Colored grays are on display
The waiting is no more Never seen before
Others bring new dawns
Imagination's opening
Inviting us on board Here comes the flashover Myriads of silver discs
The over mind
Has signaled another lift Dimensions of time have come undone
Now we have become so unalone Migration, space, extensions, differences
Information increases becoming
What the mystery is
