It Was Something

Justincase

I took a ride in the back seat of her car
We stopped at the corner to see the local bar
I saw them dance and sing all their lovely songs
And I asked myself "Why aren't you smiling, what's wrong?"It's got something to do
With not having it all together
It's got something to do
With not having it all togetherAnd it was something good she left behind
And it was something pure, she changed my mind
And it was something good she let me find
Well I always get behind and I'm leavin' mineNow that I drive so slow I can't get hurt
A rear end's much better than a head on heart
'Ts why I keep my mirror in focus and my head high
Just in case I see you with the girls in the skyIt's got something to do
With not having it all together
It's got everything to do
With not having it all togetherAnd it was something good she left behind
And was something pure, she changed my mind
And it was something good she let me find
Well I always get behind and I'm leavin' mineAnd it was something good she left behind
And was something pure, she changed my mind
And it was something good she let me find
Well I always get behind and I'm leavin' mineAnd it was something good she left behind
And it was something pure, she changed my mind
And it was something good she let me find
Well I always get behind and I'm leavin' mine
I took a ride in the back seat of her car
