

# Go On Drone

## Hey Mercedes

Sarah slides up to the bar and orders me  
the strongest thing this side of armor street  
she's got the saddest eyes i've ever seen  
when she says  
oh baby were you ever meant to be  
well maybe  
now sexy don't get so excited  
besides  
you're so much cuter when you try to fight it  
your're filling up the room with that terrible gloom  
and the mere thought of a turnaround is bring the whole place down  
stop the press  
who is that mess  
go on drone  
we've never been so impressed  
go on drone  
stay home  
afraid of the phone and famously alone  
go on drone  
ture love might be fun for some  
but we know that it's just too tough  
is there the proper power left to hold us in  
so we'd stay golden  
so i'm always working on new grand ways to avoid  
doing any work on everything  
that could amount to anything  
the poor poor cat  
don't lie like that  
in regret's bed  
in beads of sweat  
blurry head  
ruby red  
not yet deceased  
undead instead  
hardly home de chez rainbow  
je ne sais quai  
je t'aime cell phone  
we know you know how  
don't you drone

we know you know  
stop the press  
who is that mess  
go on drone  
we've never been so impressed  
go on drone  
stay home  
afraid of the phone and famously alone  
go on drone  
we are all done now
